Power Pro Hotel System ™
Features List

Operating System, License & Generals

1	Server Operating System : Microsoft Windows ™ Server 2003 or
2	**Linux** for Server Operation System
3	Client Operation System: Microsoft Windows ™ (XP Home, XP Professional, Vista)
4	SQL Database Engine
5	NO License Required for Server Database Engine (need extra cost)
6	NO License Required for Client Database (need extra cost)
7	NO License Required for Report Writer Designer
8	NO Extra Cost for POS Interface
9	NO Extra Cost for PABX Interface
10	NO Extra Cost for Key Lock Interface
11	NO DOWNTIME in Night Audit: Running 24 hours x 7 days
12	NO Reindex
13	Support difference multiple Screen Resolution
14	Touch Screen POS
15	PDA POS Support
16	Check In with PDA
17	Easy to use
18	System can run on thin Client
19	Report can be view real time on Web Browser

Modules

Front Office System
- Individual & MICE Reservation, Registration & Cashier
- Night Audit
- Housekeeping
- Sales & Marketing
- Statistics
- Real Time Room Availability, Visual Density Chart
- Room Revenue Management (Variable Room Rate, Add Hoc Room Rate)
- Reporting
- Income Audit (No Re-entry)

Back Office System (same product, not third party product)
- Account Receivable
- Logistic Management (Inventory & Cost Control)
- Account Payable
- Fixed Asset
- Bank Book
- Budget Control
- General Ledger
- Financial Report Worksheet

Point of Sales (same product, not third party product)
Devices Interface (PABX, Key Lock, Internet Billing)

Front Office Module

1	Individual Reservation
2	MICE Reservation
3	MICE variable Room Blocking (MICE member may Check In any day, not only on first day, either Check Out)
4	MICE Add Hoc Room Rate Designer
5	Unlimited Additional Folio
6	Shared or Additional Folio can be search
7	Search can be on any position on Guest Name & Company etc
8	Advance Room Rate Management
9	Variable Room Rate
10	Travel Agent Allotment

Power Pro Hotel System ™
Features List

11	Multiple Company/Travel Agent Contract Rate
12	Seasonal Contract Rate
13	Blocking (Bank Allotment)
14	Visual Density Chart with Drag & Drop
15	Drilled Down Room Inventory
16	Real Time Room Inventory/Availability (no recalculate)
17	Sales Call Record with Sound Reminder
18	Membership
19	Guest Comment
20	Maintenance Request (like Engineering Job Order)
21	User Definable Room Statistic Format & Formula
22	Support Revenue & Allowance base on Market Segment in G/L
23	User Definable Income Audit Format & Formula
24	Income Audit can be exported directly to General Ledger
25	Smart Room Rate calculation, all package transaction break down automatically (no need to break down per department code)
26	Moved Transaction can be traced with no limit number of moving
27	All Statistic Report can be drilled down into the source of transaction on the screen
28	Record Customer Correspondence
29	Auto Grading Customer Productivities
30	Customer Productivity can be drilled down into the source of transaction on the screen
31	Room Status can be Clean & Ready (Inspected)
32	Room Discrepancy
33	Customer Productivity Grade
34	Discrete MICE Room Blocking
35	Programmable Tax Calculation
36	Auto distribution Charge
37	Real Time Lookup Room Type with Availability Room
38	Housekeeping Roster
39	Dashboard (Current Status, Charts, Competitors, Agenda, Achievement etc.)
40	Customer Credit Facility Control
41	Customer Credit Limit Control
42	Incremental Search, the fasters way to search Guest Profile and data
43	More than 40 Guest Legend: get Guest Info in a seconds (Credit Limit, Repeater Guest, Room Only, Upgrade Room etc.)
44	Quick Walk In
45	Multi Currencies Guest Transaction Display
46	10 Folio Format
47	Pre Posting Room Charge
48	Pre View Room Rate Setup - make it easy to create a new room rate
49	User Define: Room Statistic Layout & Calculation
50	User Define: Income Audit/Daily Sales Report
51	User Define: Tax Calculation
52	Each Department Code (Category Code) may has difference Tax Calculation
53	Revenue Sharing Calculation (at any percentage)
54	Display Tax, Hidden Tax, Included Tax Methods
55	Discrete Package in Room Rate
56	Add Hoc Room Rate
57	Room Revenue, Package can be distribute base on Market Segment & Room Type, make it easy to create Financial Report base on Market Segment
58	Floor Plan
59	Build In Floor Plan Designer
60	Charge Direction (Charge Router)
61	Discount Calculator
62	Open Room Rate
63	Room Number Lookup: real time density chart
64	Room Features, e.g. Sea View, Garden View etc.
65	Schedule Room Rate & Package

Power Pro Hotel System ™
Features List

66	Load Guest Profile from History
67	In Side & Out Side Allotment Reservation
68	Statistic Group, e.g. Market Segment can be grouped by Group of Market Segment
69	Statistic Code: Market Segment, Nationality, Reservation Source, Origin Area, Destination Area
70	Productivity Statistics by Company, Market Segment, Nationality, Reservation Source, Origin Area, Destination Area, Sales Person, Company Type, Customer Area, Room Type, Room Number, etc (13 dimensions)
71	Productivity Statistics base on Room Revenue, Room Rate, Room Night, Food Revenue, Beverage Revenue, Laundry Revenue, etc (22 dimensions)
72	300 Statistics Data (23 x 13 Dimensions), e.g. Market Segment may has data for Room Revenue, Room Night, No of Person, Food Revenue etc.
73	Can display Folio base on Others Currencies
74	Display Multiple Folio in single screen
75	Click and Drag to move transactions
76	Guest Letter can be created and redesigned as needed (e.g. Welcome Letter, Confirmation Letter, Check Out Reminder etc.)
77	All transferred transaction can be traced with out any limitation of number of time
78	Interfaced Transaction can display the source of transaction, e.g. F&B Bill, Minibar Bill, Laundry Bill, Phone Bill.
79	Can print Selected Transactions as standard folio format
80	Support Rate for Children
81	Can block all MICE's member Phone from MICE Profile
82	Add Hoc MICE Room Rate
83	MICE Charge Direction (Charge Router)
84	MICE Contact Agenda, e.g.. Confirmation Reminder, Rooming List Reminder, etc.
85	MICE Letter can be made or modified as needed
86	MICE linked to Venues Booking
87	Meal Arrangement
88	Automatic Event Order Form
89	Event Order can be modified as needed
90	Easy to Split Transaction to Others Folio
91	Enable to Load & Remove MICE Member even MICE already Check In
92	Cash Basis Folio or Cash Basis MICE's Member (All transaction should be paid in cash)
93	Close for transaction (Guest can not make any transaction even guest still in House)
94	Easy to change Housekeeping Room Status for single or multiple rooms
95	Real time Extra Bed Availability
96	Sleep Out Legend
97	Long Stay Guest Legend
98	Honeymoon Legend
99	No Info (Incognito) Legend
100	Cash Basis Legend
101	Blocked Phone Legend
102	Extra Bed Legend
103	Guest Complain Form
104	Complains linked to repeat guest profile
105	Night Audit can run with out DOWN time for Front Office or any Interface Devices
106	Room Count Sheet Report
107	Night Audit - Pre Posting Report
108	Night Audit Process less then 10 minutes
109	Enable to control F&B Point of Sales from Night Audit Menu
110	Instant Daily Sales Report / Income Audit
111	No Re-entry on Daily Sales Report / Income Audit
112	Drilled Down Daily Sales Report / Income Audit Transaction to Guest Folio and detail transaction
113	Use Define Daily Sales Report / Income Audit
114	Daily Sales Report / Income Audit - Month to Date, Year To Date Auto Calculation
115	Daily Sales Report / Income Audit - Last Month, Last Year
116	Daily Sales Report / Income Audit - Budget & Forecast
117	Daily Sales Report / Income Audit - Ready to export to General Ledger with no entry

Power Pro Hotel System ™
Features List

118	Real Time Phone Billing Console
119	Real Time integrate with PABX PMS Features

Device Interface

1	Build In PABX Interface (Billing & PMS) (same product, not third party product)
2	NO Extra cost for PABX Interface
3	Build In Key Lock Interface (same product, not third party product)
4	NO Extra cost for Key Lock Interface
5	Build In Mini Bar Attendant using IVR (same product, not third party product)

Reporting Tools

1	Build In Report Writer
2	Can create new reports
3	Reports can be redesign
4	Support Graphic Report (for laser printer)
5	Support ASCII Report (for dot matrix printer)
6	Support PDF Output
7	GL – Financial Report can be created like spreadsheet (Microsoft Excel ™)
8	GL – Financial Report can be drill/trace into source or transaction
9	Internet & Intranet - On Line Reporting
10	Internet & Intranet -All Front Office Report can be viewed
11	Internet & Intranet -Drill Down Reporting
12	Internet & Intranet - User can create new interactive page
13	NO-License Required to Run/Design Report
14	NO-Need Other Third Party Software to Design Report

Logistic Management (Inventory & Cost Control)

1	Purchasing – Contract Price to Supplier
2	Market List
3	Purchase Request Biding with many supplier
4	Store & Direct Purchase Receiving
5	Store Request & Issuing
6	Inter Location Transfer
7	Spoilage & Breakage
8	Production
9	Recipe Manager Integrated with Point of Sales
10	Unlimited Recipe in Recipe
11	3 Cost information in Recipe (On Hand Cost, Last Cost & Manual Cost)
12	Multiple Store/Location
13	Can view any previous transaction with out restore
14	Can view General Ledger Transaction in any Inventory Transactions
15	On Line Department Consumption
16	On Line Department Consumption vs. Budget
17	Department Budget integrated with General Ledger (no reentry budget in Inventory System)
18	Integrated with General Ledger (no reentry transaction in General Ledger)
19	On Screen - General Ledger can trace Inventory Transaction

Account Receivable

1	City Ledger
2	Multiple Cash Receipt per Invoice
3	Multi Currencies
4	Credit Card Ledger
5	On Line Aging & Mutation Browser
6	Drill Down Aging & Mutation
7	Multiple Invoice Format

Power Pro Hotel System ™
Features List

8	Invoice can be trace into Guest Folio
9	Deposit
10	Invoice (C/L) paid by Credit Card
11	Deposit Paid by Credit Card
12	Back Dated Aging Report
13	Back Dated Mutation Report
14	Aging can be view and drill on Internet/Intranet

Account Payable

15	Deposit
16	Multiple Payment per Voucher
17	Multi Currencies
18	On Line Aging & Mutation Browser

Power Pro Solution™

hotel & restaurant information solution

www.ppsolution.com

Profile
P.T. Infotek Jaya Makmur

Permintaan
P.T. Metrodata Tbk.

In 1991, only a few restaurant, stores, supermarket were using computerized accounting system for processing data. At that time, **Pizza Hut Indonesia** faced a difficulty to record the revenue transaction rapidly and accurately , therefore Pizza Hut require PT Metrodata to look for Point of Sales that could be operated for all Pizza Hut in Indonesia.

P.T. Metrodata through Mrs. Lumaxi and Mr. Datniel T. Hendro required Mr. Jayanto to develop the POS according to Standard Pizza Hut Indonesia. Since that day, PT Infotek Jaya Makmur was established under the name of PT Kommit Paramita. POS software made under the name of Commit Restaurant System.

At that time, software developed using **CA-Clipper** version 5.1e with database **Btrieve**™.

Pizza Hut Indonesia

On October 1, 1991, POS software has been completely done and first time installed at **Pizza Hut Djakarta Theater** and continually installed in all Pizza Hut 's outlets in Indonesia.

Furthermore, many restaurants in Indonesia are using Commit Restaurant System.

Hospitality Software

The Commit Restaurant System has been developed successfully and using in many restaurant in Indonesia, P.T. Metrodata through Mrs. Lumaxi, desired to develop for hospitality software repetitively.

First Hotel

Research and development was still progressing, finally hospitality system was accomplished in 1993 and first time installed at Hotel Penta – Cirebon with the room capacity of 34.

Since that time, the developers self –assurance that only developing the hospitality software for Hotel dan Restaurant, even though we already have the supermarket software that installed in many super markets.

Interface with
PABX & Key Lock

During the implementation of hotel system, we developed time after time and we lastly succeed to make an interface with PABX – Nortel and Philips. As well, many prominent PABX and Key Lock system are manageable and available interfaced by our hotel system.

In 1995, Microsoft released new version operating system which was call Microsoft Windows 95. At that time, no many users ware interested in that operating system because of some reasons. Power Pro starting to work out and research for migrate to Microsoft Operating System.

The difficulty happened as a result of no more strong tools that could perform development software *Graphics User Interface* (GUI) properly. Finally in 1997, we completely succeed to adopt of the best software, **Borland Delphi 5**, for developing the hotel system**.**

SQL Technology

Interbase is one of our Database Engine. It is an Open Source database which is called "**Firebird**". "Firebird" is software database engine that can be run in Microsoft Windows™, Linux, Unix and others operating systems.

Sharing Experience & Knowledge

During developing of software, we share experience and knowledge with other programmers/developers in publishing a book with the title "*Membuat Applikasi Database dengan Delphi*". This book is published at beginning of 1999 and republish for 3 times during 6 (six) months.

P.T. Infotek Jaya Makmur

On Mei 2000, the composition of shareholders was changed and the software development is under the company of **P.T. Infotek Jaya Makmur** repetitively.

Power Pro runs on Microsoft Windows

At the same time, Power Pro Hotel System is running in Microsoft Windows operating system which was implemented firstly in hotel Puri Khatulistiwa and perform properly. As a result, all applications of Power Pro are successfully running in Microsoft Windows.

Swissbel-hotel

In 2003, Swissbel-hotel Indonesia starts using Power Pro Hotel System on Pat Mase, Swissbel-hotel Borneo – Banjarmasin, Bandung, Samarinda, Tarakan, Menado, Jayapura and others swissbel-hotel.

Bali Branch

In 2004, P.T. Infotek Jaya Makmur cooperate with Mr. Sampurna for selling in district of Bali. Since that time, Bali Office is the first branch office of P.T. Infotek Jaya Makmur.

5 Stars & Diamonds Hotels

Nusa Dua Beach Hotel is a diamond hotel (five stars plus), entrusted using Power Pro Hotel System for Back Office. In addition, **Kuta Paradiso Hotel**, a five stars hotel, located in Kuta also employed fully integrated Power Pro Hotel System. Moreover, **Melia Benoa**, a five stars , under the hotel management Melia, utilized fully integrated Power Pro Hotel system and others.

In 2007, Microsoft released the latest Operating System which is called Microsoft Windows Vista, with many development in appearance for user friendly.

New Icons

To anticipate of user friendly and the new appearance , Power Pro follow the new version with the change of logo and icons.

The new Icons which appearance in all application Power Pro's program are using the natural typically are leafs.

Migrate to Graphic User Interface

Although those appearance are not giving more contribution to users, but those icons would assign comfortably to all Power Pro's users.

Invited by Microsoft Indonesia As Speaker

With all opportunities, Power Pro effort for developing of technology. For instance, keeping up with all development through Microsoft.

Mr. Risman (Dotnet Evangelist) interested in willpower from developer of Power Pro consistently only develop in hotel system for many years and successful in implementation almost hundred of hotel in Indonesia. A certain kind of commitment once in a blue moon in Indonesia, because in Indonesia mostly software developers are tailor made or making software based on job order, unlike making a product like Power Pro.

With those reasons that's why Power Pro and team support were invited for sharing the experience and knowledge for software developers in Indonesia with the topic "*How to Start ISV Business*" on Februari-Maret 2007. Presentation has been provided to many participant software House companies in Indonesia.

Preventive Actions

The teams of Power Pro have realized that if there is a problem occurs in customer due to blunder users, network and hardware problems or bugs , it would be happen for second time, third time or maybe thousand times. The mistaken must be settled and never happen again.

For the above problems, the all modules of Power Pro Hotel System should have additional procedures in order to prevent the error again.

On the other hand, the errors mistaken resulted that could be detected and must have a tool for repairing, so the users can fix quickly if happen again.

In order to guarantee the quality of software, so before the software on sales, it should be testing. Because if the mistaken of software is found during testing, the expense disbursement only one cent, but if the mistaken resulted in customer, so the expense disbursement maybe millions.

Develop Users' Trust

If Power Pro producing the financial report , all figures in report can be proof to the source data transaction, for instance, total room reserved by guests, Power Pro can proof online a few second to name of guests even though a few months in the future.

Statistic figures, for instance, Number of Room Nights at Market Segment can be name of guest only a few second.

The figures of financial reports (Financial Statement), for instance, Room Revenue, can be traced to name of guest at Front Office.

With proven all figures in report, so that would be increased the level of credo of customer. Finally customers can maximize utilizing Power Pro Hotel System.

Master Piece

The purpose of process the company 's financial data is issuing the Financial Statements which consists of Balance Sheet and Income Statement. Power Pro design a software that can create the financial statements rapidly and accurately as spreadsheet or maybe like Microsoft Excel ™.

Drill Down

Growing Persistently

Power Pro Financial Worksheet is a master pieces software that workout as Microsoft Excel™, but the figures appear in spreadsheet doesn't need to reentry. All figures to be called from financial statement, so the form of financial statements can designed and organized by user itself.

In order to increase the trust of customer, so the all figures can be appeared and drilled down through the source data of transactions. For instance, the figure in account of "Paper Supply & Stationeries "not only can be traced to name of inventory which is used but also can drilled down who request and who hand over the inventory accurately. As a result, all transactions can be drilled down to original data and related accouts.

"Room Revenue" also can be traced to name of guest and who do the process posting and drilled down to original data of transaction.

The tracing process is called Drill Down. Using Power Pro Financial Worksheet can be traced or drilled down up to 11 levels.

One of our customer comments above the common about the Drill Down says "Jobs doing in day by day, now can be done only a few minutes".

We Proud to all teams of Power Pro is we are working for self development for our futures. By this principle, all our teams of Power Pro will work dynamically every day in order to reach our dreams

Our happiness raising when we know our customers fulfill satisfaction and free from anxiety. We obtain new customers that mostly recommended from our experience users due to theirs satisfaction.

Products

1. Front Office
